SUCCESSFUL INVASION OF LEFT SITES:
BY EXTRANIC COMPRESSION FROM AN
COMMON ARTERY COMPRIMING OR LEFT MAIN
REICCITION: AYN RESERVE-ENDER
AND FRACTIONAL FLOW RESERVE-FED
ELECTIC PRESSION OVER 2,000

Description of the patient's medical history and physical examination.

TREATMENT APPROACH:

1. Medical Therapy
2. Percutaneous Coronary Intervention (PCI)
3.冠状动脉搭桥手术 (CABG)

Complications and potential outcomes:

- MACE (Major Adverse Cardiac Events)
- Death, myocardial infarction (MI), stroke, target vessel revascularization (TVR)

Follow-up and management recommendations:

- Regular check-ups
- Lifestyle modifications
- Medication adherence

Signatures and dates of healthcare providers.

ANATOMICAL INFORMATION

- Left anterior descending artery (LAD)
- Left circumflex artery (LCX)
- Right coronary artery (RCA)

Functional assessment and exercise tolerance.

Cardiac catheterization data and coronary angiography images.
