

Aegyptio-Afroasiatica XXVII

Gábor Takács
ELTE, Hungary¹

Introduction

During my current work on the Egyptian Etymological Word Catalogue (EEWC, ongoing since summer 1994), it has become possible to identify a great number of new lexical correspondences between Egyptian and its vast Afro-Asiatic (Semitic-Hamitic) kindred. The series of papers „Aegyptio-Afroasiatica” has been started in 1995 for reporting these results². The numbering of etymological entries is continuous beginning from my very first report.

551. Eg. nn.t "eine Pflanze, aus der man Körbe macht: Binse (?)" (PT, GR, Wb II 274, 10) = "unbestimmbare Pflanze" (PT 557b, ŰKAPT III 51) = "eine Pflanze, aus der man Körbe macht: eher eine Rohr- oder Binsenart" (Keimer 1984, 29, 72.§ and p. 30, n. 6 with exx.) = "*Weide" (GHWb 416)³ || NBrb.: Shenwa i-lni ~ i-lenni "roseau que l'on introduit dans l'onstou pour écarter les fils" [Laoust 1912, 146] || SBrb.: ETawllemmet tē-lēn-t "ressemble à sensitive, graine dans gousse allongée, hauteur de la plante: 0 m. 50" [Ncl. 1950, 41] = tē-lēn-t "espèce de roseau, jonc des mares" [Ncl. 1957, 57] = te-lān-t, pl. te-lān-en (and so also in Ayr) "1. esp. de plante (ressemble à la sensitive ou mimosa française), Cassia negricans, 2. esp. de jonc (pousse dans les mares)" [PAM 2003, 492] || ECh.: Somray nālā "bamboo" [Jng. 1993 MS, 47].

552. Eg. nn.t "Name eines Vogels" (MK, Wb II 272, 8) = "kind of goose" (Davies, JEA 35, 1949, 16, nr. 10, pl. ii) = "e. Gans" (GHWb 415): perhaps to be combined with WCh.: Goemay lil "a small wild duck" [Srl. 1937, 127]⁴ || CCh.: Musgu-Puss liyliy (m, f) "canard siffleur" [Trn. 1991, 101]. Not clear whether Brb. *a-yalal "petit oiseau" [Ksm. 1999, 201, #600] > NBrb.: Shilh a-yalal "oiseau de petite taille", medieval a-yalal-en (pl.) "oiseaux" [Ksm.] || SBrb.: Ahaggar (so also in ETawllemmet and Ayr) ā-yalal "pintade" [Fcd. 1951-2, 698] || WBrb.: Zenaga tē-ižel ~ tē-ižel [ž/ž < *l] "corbeau" [Ncl. 1953, 271, 401, 475] ||| ECu.: Tsamay lāl-o "bird sp." [Sava 2005 MS, 248] ||| WCh.: Hausa láálò "2. type of bird" [Abr. 1962, 612] are also related.

553. Eg. nn.(w)t (pl., rope or curl determinatives) "replis (?)" (CT VII 209g, AL 78.2131) = "coils (?)" (DCT 232):⁵ to be equated with NBrb.: Qabyle √ln: e-In-et and llen-tet "1. tendre les lissettes ou boucle de lisso, 2. être passé, tendu (fil de lisso, tissage sur métier de haute lisso)", i-hni, pl. i-In-an "1. lisso (tissage), 2. ficelle" [Dlt. 1982, 457] ||| WCh.: Hausa láyáá "2. tying rope round and round sg.", láyáčeé "1. tied string round and round sg." [Abr. 1962, 614] < AA *√ln "to tie around" [GT]? Alternatively, cp. Sem.: MArām. (Talmud, Midrash) nīnyā~nīnyā "ein Seil aus Hanf" [Levy 1924 III 388] | Yemeni Ar. nūnah "large plait bent backwards from the crown of the head forming a loop, thereby decorating a bride's hair" [Piamenta 1990, 501] ||| LECu.: Oromo-Borana noni-ō "a rope around the muzzle of a camel during a transport" [Stroomer 1995, 212] ||| CCh.: Hurzo nān "attacher" [Mch. 1953, 179] ||| ECh.: Sokoro nínē "binden" [Lukas 1937, 36]. Or perhaps any connection to Sem.: Hbr. lēlā'ōt ~ lālā'ōt (pl.) "knots, loops" [KB 530]⁶

¹ The author gratefully acknowledges the support of the Hungarian Academy of Sciences for its Bolyai research fellowship facilitating the accomplishment of the present paper in the frames of the project targeting the linguistic prehistory of Ancient Egyptian.

² A list of parts I-X with the places of publication can be found in „Aegyptio-Afroasiatica XII”, in: *Lingua Posnaniensis* (Poznań) 39 (1997), 93-98. Part XI was published in *Acta Orientalia Acad. Scient. Hung.* (Budapest) 58/4 (2005), 409-420. Part XIII appeared in *Lingua Posnaniensis* 45 (2003), 121-127. Part XIV in *Lingua Posnaniensis* 42 (2000), 151-160. Part XV in *Lingua Posnaniensis* (Poznań) 44 (2002), 163-174. Part XVI in Bács, T. (ed.): *Studia Aegyptiaca XVII: A Tribute to Excellence, Studies Offered in Honor of Ernő Gadl, Ulrich Luft, László Török*, Budapest, 2002., La Chaire d’Égyptologie, pp. 455-471. Part XVII was published in *Cahiers Caraïbes d’Égyptologie* (Schoelcher, Martinique) 7-8 (2005), 207-235. Part XVIII appeared in *Cahiers Caraïbes d’Égyptologie* (Schoelcher, Martinique) 5 (2003), 187-202. Part XIX was published in *Rocznik Orientalistyczny* (Warszawa) 57/2 (2004), 47-89. Part XX is forthcoming. Part XXI appeared in Borbone, P.G.; Tosco, M.; Mengozzi, A. (eds.): *Loquentes linguis: Studi linguistici e orientali in onore di Fabrizio A. Pennacchietti*, Wiesbaden, 2006., Harrassowitz Verlag, pp. 675-683. Part XXII has come out in *Aula Orientalis* (Barcelona) 27/2 (2009), 219-270. Part XXIII was published in *Acta Orientalia Academiae Scient. Hung.* (Budapest) 63/2 (2010), 223-230. Part XXIV in Bechtold, E.; Gulyás, A.; Hasznos, A. (eds.): *From Illahun to Djeme: Studies Presented in Honour of Ulrich Luft*, Oxford, 2011., Archaeopress, pp. 287-292. Part XXV appeared in *Acta Orientalia Acad. Scient. Hung.* (Budapest) 65/3 (2012), 359-372. Part XXVI, in turn, has been published in *Aula Orientalis* (Barcelona) 32/1 (2014), 143-149.

³ This sense is corroborated by the fact that the compound hieroglyphic sign for nn represents the "two rushes with shoots" (Gardiner 1927, 471; Fischer 1983, 34, M22) = "Binse" (Staehelin 1990, 114), which – for a reason unknown to Staehelin – was coloured in the OK mostly blue, whereas in the period of Dyn. 0 and I red (three times) or black (once), cf. Kahl 1997, 51, M23. As P. Kaplony (LÄ VI 1146) rightly notes, the nn.t-plant is "*fast identisch*" with the sw.t-plant and the circumstance that "sw.t mit 5, nn.t (*verdoppelt*) mit 3 Stengeln schreibt, ist Konvention".

⁴ Isolated in the Angas-Sura group (cf. Takács 2004, 230).

⁵ Only found in CT VII 209g. As R.O. Faulkner (AECT III 103, n. 5) supposes, there is probably no connection with Eg. nn "a garment or material" (BD 340.2).

⁶ The Hebrew word is regarded in KB 1.c. a reduplication of Sem. *√lwy "to turn, twist" on the one hand and a cognate of Geez lelit and malelit "joint, limb, member of body etc." on the other, which is, however, impossible at a time as the latter form derives from Geez lelaya "to disjoint, separate, distinguish etc." [Lsl. 1987, 314].

554. Eg. nn.wt "filet" (CT, AL 78.2132) = nn.t "fishing-net" (DCT 232) = "Netz" (GHWb 417).⁷ perhaps akin to CCh.: PMasa *l^wan "net" [GT]: Masa lúwán "1. le filet sp. dit 'épervier' (pêche), 2. le filet" [Ctc. 1983, 108] = "file de pêche" [Ajl.], Marba lúwán "filet de pêche" [Ajl. 2001, 26]

555. Eg. nn "eine Speise (unter Broten und dgl. genannt)" (NE, Wb II 275, 1) = "(among pastry)" (AEQ II 231*, #535) = "*e. Brot (in e. Verkaufsliste)" (Helck: MWNR 672, §28; GHWb 416) = "food" (GR, PL 523) ||| Sem.: Ar. na?na?a "3. nourrir bien et entretenir avec soin" [BK II 1177], Yemeni nāneh "Brot" [Deboo 1989, 196] ||| LECU.: Oromo-Borana nān-ā and - Wolane nān-ā "food, sweets" [Stroomer 1987, 372, 374; 1995, 211]. V. Orel and O. Stolbova (1989, 135; 1992, 190) combined Eg. nn with WCh.: Zaar nñj "food", which, however, cannot be derived from an earlier *nin- as they insisted.

556. Eg. nn.t (flame determinative) "Zubereitung der Milch" (XIX. Med., Wb II 272, 9) = nn (?) "Verbum zur Bez. eines Drogenzustands" (WMT 465) was correctly equated already by W. Vycichl (1934, 84) with WCh.: Hausa nuna "kochen" [Vcl.] = nùuná "1. to become ripe, 2. become fully cooked" [Abr. 1962, 708], which is in fact a reduplication of Ch. *nø "to ripen" [Nwm. 1977, 30, #105] = *vny(h) "mûrir" [Br.-Jng. 1990, 172] = *vny/w "reifen" [Jng. 1994, 446] = *nu/i-nah- "to ripen" [Stl. 1996, 83] = *nV/V- "to cook" vs. *nVh- "to ripen", *nV(nV) "to be ripe" [Stl. 2005, 100, #339 vs. 118-9, #425] deriving from AA *vhw "to cook, ripen" [GT], cf. Sem.: Ar. vhw II "commencer à avoir son noyau formé (dattes quand elles mûrisseient)" [BK II 1374] ||| Brb. *vhw "to be(come) cooked, ripe" [Bynon] > e.g., NBrb.: Shilh nua "(faire) cuire, mûrir, préparer" [Jst. 1914, 145], Tazerwalt nwu "gar, reif werden" [Stumme 1899, 213], Sus nwu "être cuit, mûr" [Laoust 1921, 296] | Ntifa nwo "être cuit" [Laoust 1918, 13] | Tamazight nū "être cuit, mûr", ti-nw-it "cuissón" [Abès 1916, 131, 182] = new "1. cuire, être cuit, 2. être à point, 3. mûrir, être mûr" [Taifi 1991, 506] ||| WBrb.: Zenaga vhw "cuire, être cuit, être mûr" [Ncl. 1953, 222]. Cf. also Gouffé 1974, 368 (Hausa-Brb.) and Bynon 1984, 281, #52 (Brb.-Ch.).

557. Eg. nn or nnj "le schiste ou la pierre saponaire" (Daressy, RT 30, 2) = "material of a divine statue, twice gilded, maybe a specific variety of schist of a characteristic colour (not impossible)" (Harris 1961, 89) = "schiste (?)" (Andreu & Cauville 1977, 9; AL 77.2121): cp. perhaps CCh.: Holma nwón ~ nwen "Stein" [Str. 1922-23, 128 and fn. 6] | Masa nón-ná "silure" [Jng. 1973 MS].

558. Eg. nn.w "Liege, Bett, Bank" (KHW after Černý) = "lit, couche" (AL), act. *lál.~w [GT] > Cpt. (S) λολ "Bett" (KHW) = "lit, banc" (DELCA): J. Osing (NBÄ 171, 682, n. 766), uncritically followed by W. Schenkel (1983, 226) and H. Satzinger (1994, 198, n. 40) erroneously assumed here – in spite of the Coptic evidence – an older *nán(j)w.~w (sic, *n-) and derived it from Eg. nnj "müde sein" (MK-, Wb), which is semantically very weak.⁸ Osing's theory on the shift of Eg. n...n > l...l is, besides, ill-founded⁹ and the original n in Eg. nnj "tired" is clearly evidenced both internally¹⁰ and externally.¹¹ On the top of all this, already W. Vycichl (DELCA 97) reconstructed *lál.~w (with an original *l), which he correctly equated with EBrb.: Siwa e-lhal-en [ə-lhal-ən] (pl.) "lit" [Lst.] = e-lhal-en [Bricchetti-Robecchi] = a-lal-en [Cailliaud] = lál-in [Stumme] = *i-lal-ən (pl.) [Vcl.]. Further cognates appear in SBrb.: ETawllemmet ta-sə-ləl-t, Ayr te-sə-ləl-t "natte de lit (en baguettes minces d'aʃəzo)" [PAM 2003, 478] ||| HECU.: Sidamo lal-o (m) "wooden posts that are used transversally for the Sidamo bed" [Gsp.] < AA *lal- "bed" [GT].

559. Eg. nr "to charge after" (XVIII., FD 134) = "stürmen" (GHWb 417)¹² ||| NBrb.: Qabyle vnyr: neyyer (hardly Ar.)¹³ "continuer, poursuivre" [Dallet 1982, 588-9] ||| HECU.: Sidamo nara "to have a desire for, long for (esp. coffee, salt-beasts)" [Gsp. 1983, 245] ||| Ch. *nVr- "to hunt, search" [Stl. 2005, 144, #557] > WCh.: Saya nar "hunting" [Krf.] = naar "a hunt" [Csp.] ||| CCh.: Buduma nera "suchen" [Nachtigal apud Lukas 1939, 120].

⁷ Its inner Egyptian etymologies are unsuccessful. R. O. Faulkner (AECT II 119-120, spell 477, n. 3-4), for instance, rendered nn.wt in CT VI 34i as "dead-net" identifying it with nn.wt "dead" and considering the sense "net" as a result of a simplification from, a brief form of a compound attested in CT VI 34f as h3m-mnnn.t (corruption for -nn.wt) "the net for catching the dead". J. Osing (NBÄ 733, n. 885), in turn, derived Dem. nnj.t "Honigwabe" (DG 220), vocalized by him as *j~nē/ūn.~t "mit ursprünglicher Bedeutung *Netz" and assuming an "Apokope der Vortonsilbe *j~ -> *?~ -", from Eg. jmn "1. jem. (etw.) umwenden, 2. mit hr: etw. von jem. abwenden, fortdringen" (PT-, Wb I 97, 7-8), whose basic meaning he forged to have been "*umwinden", which is nowhere attested and does not even issue from the attested senses.

⁸ The arguments for an Eg. hapax nnj "ermattet daliegen" (once in a NK tomb inscription) are very weak, cf. sw m nn r^e nb "(der des Nachts nicht schlief) er liegt alle Tage ermattet da" (Osing after Kees, ZÄS 62, 1926, 76), which can also be translated with the usual sense of nnj: "he is tired every day".

⁹ His case for Cpt. (S) ΜΑΝΙΝ, ΜΑΛΛΙΝ, ΜΑΛΙΑ "band, cord" (CD) < Eg. m^enn "das aus zwei Stricken zusammengewundene Seil" (Pfortenbuch, Wb) = "das gewundene Seil" (Hornung) = "twisted rope" (CED) = "der Doppelgewundene" (Zeidler) = "Schlangenseil, aus dessen Windungen die Stunden entstehen" (LÄ VI 1363) = „Seil (aus zwei Stricken zusammengewunden)" (GHWb), being an ex. of a nasal dissimilation of m...n > m...l, proves little about (S) λολ.

¹⁰ Cf. Cpt. (O) ΝΕΝΟΥ[T]= "Ermatten, Mattigkeit" (1x: pap. BM 10808, 1. 8, Osing 1976, 20, 66-67, NBÄ 85) < *n~nwāt=

¹¹ Sem.: Ar. na?na?a 1 "être très-faible de tête et incapable d'avoir, de résolution" [BK] = "to be tired, weak" [Ember] ||| WCh.: PAngas *n~vñ "tired" [GT]: Angas nyin „(to be) tired out, fatigued" [Flk.] = nyin [Jng.] = nyin [n~vñ] [Brq.] = nyin [Hfm.] = nyin [ALC] = nyin [Krf.] ||| ECh.: WDangla nūn "sans force" [Fédry], Mokilko nūnē (m) "(un) mort, cadavre" [Jng.]. For the Eg.-Ar. comparison see Ember 1913, 118, #72; ESS §11.a.25. In the Mokilko cognate we can see perfectly the same shift of meaning as in Eg. nnj.w "die Müden als Bez. für gespenstische Tote" (ME, Wb).

¹² Compared by Ch. Ehret (1995, 333, #651) with Ar. vnrš "to reach for, take in one's hand" and a certain ECU. *pawr- "to arrive, come up to" (one of Ehret's ECU. reconstructions that are much less reliable than those by H.-J. Sasse 1979), which semantically do not fit.

¹³ No Arabic root appears it might be explained from. BK II 1375 only has vnyr IV "2. appeler qqn. tout haut".

560. Eg. nrj (IIIae inf.) "erschrecken, schaudern, schrecklich sein" (PT-, Wb II 277, 4-8) = "to be terrified, shudder" (Breasted 1930, 143-144), also intr. "to be afraid" (PT, Allen 1984, 570): its etymology has been surrounded by controversies as usually in Egyptian. It was treated by W. Westendorf (1962, 11, §22.c.5) as a mere root variety of Eg. nwr ~ 3wr "zittern", which is semantically certainly not tenable. Not much better is the suggestion by E. Zyhlarz (1934, 119), who equated it with Tuareg ę-nrú ~ ę-rnú "obsiegen, übermächtig sein", but the SBrb. root was *√rnC₃ (C₃ = weak consonant?) with a basic meaning "to win, subdue" [GT].¹⁴ Let alone A.R. Bomhard (1981, 450; 1984, 277, #295), who combined the Eg. root directly with IE *nə/ar- "to be strong, manly". The true cognates of Eg. nrj appear in Sem.: Hbr. √n'r "to be abhorred, spurned" [Guillaume] = piel "to repudiate" [KB]¹⁵ | (?) Ar. √nwr II "10. effrayer, effaroucher", X "3. mettre en fuite en effrayant qqn." [BK II 1364-5] || Ch. *√nr "to fear" [JS 1981, 101, C₂]¹⁶ > CCh.: Masa nárá "craindre", náàrà "peur", náár-dá "le peur" [Jng. 1973 MS] = ńär "1. la peur, 2. (adj.) qui a peur, 3. le pereux, le lâche" [Ctc. 1983, 121] || ECh.: Kwang-Mobu nááré "to fear" [Jng. 1972 MS, 22, #569] = -Mobu naare vs. -Ngam naaré "craindre, avoir peur" [Lns. 1982, 109; 1984, 69], Kwang-Gaya tê-ńAr and -Alowa tê-ńar and -Mindera ti-nAr "avoir peur" [Coates 1991 MS, 3]. Since Eg. nr.w "der Schrecken, Respekt" (PT-, Wb II 277-8), i.e., *nřr-w (Schenkel 1983, 226; Kahl 1994, 78),¹⁷ contained not just a translational, but a "real" [-r-],¹⁸ the alternative AA etymology (another AA root for "to fear" with *-l-)¹⁹ is to be ruled out.

561. Eg. *√nrj > nr.wt "Art Bruch (der Rückenwirbel und der Rippen)" (Med., Wb II 279, 8-9) = "an injury producing a rending or strain of an articulation without a dislocation or a break: a sprain (in a vertebra of neck)" (Breasted 1930, 320-322) = "Zerrung (als Knochengelenkverletzung)" (GHWb 418; WMT 467) = "sprain or joint injury" (Nunn 1996, 223): finding it "difficult to trace nr.wt to any known root", J. H. Breasted (1930, 323), nevertheless, could not resist the temptation of falling into a speculation that "it has evidently (!) inclined in its semantic history in a different direction from nr.t 'fright, terror' ... or nr.t 'neck' (of collar bone) ...", for either of which, however, he failed to present a convincing argument. Instead, there is no serious obstacle in the way of combining Eg. nr.wt with ECu.: Dullay: Harso and Dobase nar- "zusammenfallen einstürzen (altes Haus, Stuhl, Baum u.ä.)" [AMS 1980, 176]²⁰ || ECh.: EDangla nòriyē "dissoudre, désintégrer, désagréger" [Djibrine & Montgolfier 1973, 220] | Mawa nár-áj (verbal noun suffix -áj) "zerstören" [Jng. 1978, 38] = nárē "ich zerstöre" [Jng. 1981, 56].

562. Eg. nrj "bestimmter Zeitpunkt, bes. beim Ackerbau" (NK, Wb II 279, 11-13) = "specified time, term" (CED 105 pace Wb) = "time, the return of the year" (AEI I 12*, nr. 57; Caminos 1954 LEM, 380f.; 1956, 33-34; FD 135) = "das wiederkehrende Jahr (nicht einfach Zeit, wie noch Gardiner dachte)" (Guglielmi 1973, 155), nr.t "year", (m) nr.t-nr.t "year after year" (Blackman & Fairman, JEA 29, 1943, 23f.) || HEcu. *nir- "year, last" [Hudson 1989, 419]. With regard to Cpt. (B) NEI, NHI, (L) NEE (f) "Termin, Zeit(punkt)" (KHW 120; Vergote 1950, 293) = "délai, terme, instant" (DEL 141) < Dem. n3j "Zeit" (DG 205:5) vs. nj3 "term, timespan" (Smith 1987, 171) < *nérj(w/j) (NBÄ 432) = *nirj.at → *ni3j.at ~ *niy3.at (DEL 141), in which *-e/i-, besides, corroborates the correctness of its equation with HEcu. *nir-, one can hardly agree with V. Orel and O. Stolbova (1992, 189; HSED #1665) to affiliate Eg. nrj with CCh.: Matakan lež and Banana lor "time".

Abbreviations of languages

(A): Akhmimic, AA: Afro-Asiatic, Akk.: Akkadian, Ar.: Arabic, Aram.: Aramaic, (B): Bohairic, Bed.: Bed'awye, Brb.: Berber, Ch.: Chadic, CCh.: Central Chadic, CT: coffin texts, Cu.: Cushitic, ECh.: East Chadic, ECu.: East Cushitic, E: East(ern), Eg.: Egyptian, EWLmt.: East Tawllemmet, (F): Fayyuminic, GR: Greek (Ptolemaic) and Roman Period, GW: syllabic or group-writing, HEcu.: Highland East Cushitic, IMP: Intermediate Period, JArab.: Jewish Aramaic, (L): Lycopolitan (or Subakhmimic), LECu.: Lowland East Cushitic, Lit.: literary texts, LP: Late Period, M: Middle, MK: Middle Kingdom, N: North, NBch.: North Bauchi, NBrb.: North Berber, NK: New Kingdom, NOM: North Omotic, OEG: Old Egyptian, OK: Old Kingdom, Om.: Omotic, PCh.: Proto-Chadic, PCu.: Proto-Cushitic, PT: pyramid texts, S: South(ern), (S): Sahidic, SBrb.: South Berber, Sem.: Semitic, W: West(ern), WBrb.: West Berber, WCh.: West Chadic, WSem.: West Semitic.

Abbreviations of author names

¹⁴ Cf. Ahaggar e-rnu "vaincre" [Fcd. 1951-2, 1643], ETawllemmet and Ayr a-rnū "vaincre, subjuger etc." [PAM 2003, 674].

¹⁵ The etymology of this Hebrew root, rendered in GB 478 still as "(ein Heiligtum) entweihen, (einen Bund) aufheben", has always been heavily debated and until now – in my opinion – unsettled. In KB 658, a number of false cognates are quoted, namely Ar. √nwr III "to insult" (after König), Hbr. √n'r "to roar" (after Driver), held to be a dialectal by-form of Hbr. √rr "to curse" (KB). A. Guillaume (1965 IV 9), in turn, equated it with Ar. ma?ira "to be hated". E. Klein (1987, 401) suggested a comparison with Akk. nárū ~ nérū G "(er)schlagen, töten" [AHW 780], which is certainly out of the question the underlying Semitic root being *√nhr "durchstechen, -bohren" [AHW].

¹⁶ The comparison of Eg. nrj with C/ECh. *nár "to fear" (without mentioning reflexes in the Chadic daughter languages, just with a remark: "reconstruction error?" for an expected *nar) was first put forward by Ch. Ehret (1995, 331, #646) along with two further uncertain parallels: Ar. √nhr "to hide o'self for fear" and SCu.: Qwadza nyele-siko "thing of supernatural danger".

¹⁷ M. Görg (VT 35, 1985, 363-368, cf. AEB 85.328) explained, by the way, Hbr. nřr "ein 'Machtzeichen' Davids" (in 1 Kings XI 36), which, by the way, is traditionally rendered "Licht, Leuchte, bildl. v. Fortbestehn eines Geschlechtes" [GB 503] = "light, lamp" [KB 697], from Akk. nřru "1. Joch, Querholz, 2. Joch der Herrschaft" [AHW 793-4] = "dominion" [Görg] as well as Eg. nr.w "terror".

¹⁸ This [-r-] is reflected in the personal name transcribed as Ávīq̄ reflecting Eg. ń3-nr.w, cf. NBÄ 85.

¹⁹ Nbrb.: Tamazight nnul "1. craindre, 2. s'enfaire, s'inquiéter, se soucier" [Taifi 1991, 490] || ECh. *√jn- "peur" [JI]: Tumak lājñ "craindre, avoir peur" [Caprile 1975, 79], Gadang láány "avoir peur" [JI 1990 MS, 1, #17] | Somray laíne "fürchten" [Lukas 1937, 80] = lány "avoir peur", lányá (m) "peur" [Jng. 1993 MS, 41].

²⁰ This word was identified by Ch. Ehret (1991, 268, #242) with LECu.: Arbore jar-đ-os "to make thin, emaciate (tr.)" etc. < ECu. *ŋa/ir- "to be weak, frail", which is semantically unconvincing.
