Keywords: Norway spruce; bark; torrefied wood; pyrolysis kinetics; thermogravimetry; distributed activation energy model.

Scope of this document: Expanding the corresponding journal article by an unabridged table of the obtained parameters and by a figure that shows the partial curves and the fit quality for the 36 experiments evaluated together in Evaluation 3.1.

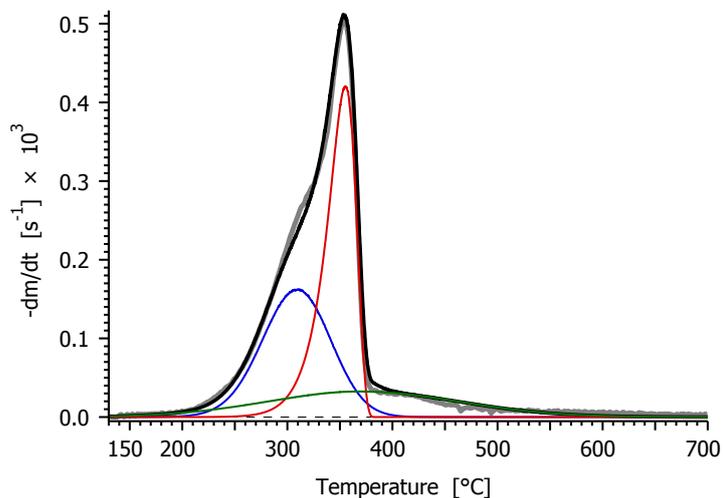

Contents:

Table S1: The parameters resulting from the evaluations of the present study and from earlier works	2
Figure S1. Kinetic curve fitting for 36 experiments in Evaluation 3.1	3 - 11

Table S1: The parameters resulting from the evaluations of the present study and from earlier works^a
