Taxonomy

Kingdom	Phylum	Class	Order	Family
Animalia	Chordata	Mammalia	Chiroptera	Vespertilionidae

Taxon Name: *Falsistrellus mordax* (Peters, 1866)

Synonym(s):

- *Pipistrellus mordax* (Peters, 1866)

Common Name(s):

- English: Pungent Pipistrelle

Taxonomic Notes:

The Chinese record is likely based on a specimen in the American Museum of Natural History (44565), which is actually *F. affinis*. Otherwise, the species is known only from Java, Indonesia. However, its taxonomic affinity to *affinis* and *petersi* needs a review.

Assessment Information

Red List Category & Criteria: Data Deficient [ver 3.1](#)

Year Published: 2016

Date Assessed: December 24, 2015

Justification:

This species is assessed as Data Deficient as there is little known of the species' range, population abundance, ecology and threats.

Previously Published Red List Assessments

2008 – Data Deficient (DD) – <http://dx.doi.org/10.2305/IUCN.UK.2008.RLTS.T17351A7008069.en>

1996 – Lower Risk/near threatened (LR/nt)

Geographic Range

Range Description:

This species is known only from Java, Indonesia, but was incorrectly included in the fauna of China based on Wang (2003), who listed it from Yingjiang, Yunnan.

Country Occurrence:

Native: Indonesia (Jawa)

Distribution Map

Falsistrellus mordax

Falsistrellus mordax

Range

■ Extant (resident)

Compiled by:
IUCN (International Union for
Conservation of Nature)

The boundaries and names shown and the designations used on this map do not imply any official endorsement, acceptance or opinion by IUCN.

Population

The abundance and population size of this species are not known.

Current Population Trend: Unknown

Habitat and Ecology (see Appendix for additional information)

Nothing is known about the natural history of this species.

Systems: Terrestrial

Threats

The threats to this species are not known, but if it is dependent on primary forest then deforestation will be a major threat.

Conservation Actions (see Appendix for additional information)

It is not known if the species is present in any protected areas. Further studies are needed into the distribution, abundance, ecology, and threats to this species, as it may well be declining, especially if reliant on primary habitat.
